Table 1: Comparison of pruning methods across LLaVA series. All numbers report **Rel.** (%), the ratio of pruned model accuracy to baseline. Red : attention-based. Green : attention&diversity. Blue : diversity-based. Cyan : coverage-based. Purple : ours. "–": not available. Detailed per-benchmark results are provided in Appendix D.

Method	**LLaVA-1.5-7B** (2023) 576 tokens			**LLaVA-1.5-13B** (2023) 576 tokens			**LLaVA-NeXT-7B** (2024a) Upper(Up.) 2880 tokens			**LLaVA-NeXT-13B** (2024a) Upper(Up.) 2880 tokens
